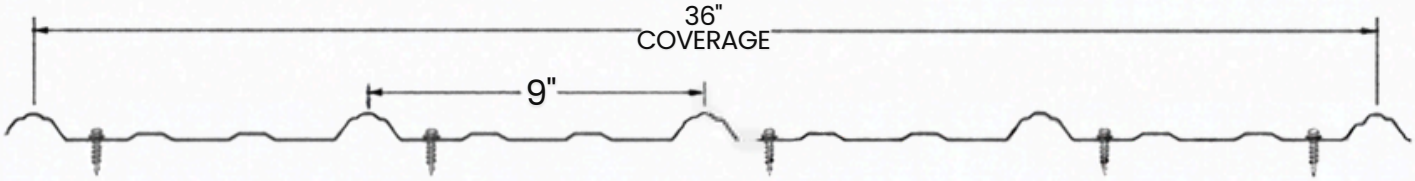
36" Wide Coverage • 9" Rib Spacing • 3/4" High Rib
*Only available with Galvalume Panels.
Premium Color at Additional Cost.

Tuff Rib Panel Profile



What is the difference between Galvalume® and Galvanized Substrates?

Underneath the high-performance paint color is either a Galvalume® or Galvanized coating. Galvalume® is a coating with zinc, aluminum, and trace amounts of silicon for great long-term performance. Galvanized coatings have a higher concentration of zinc that fights weathering and gives a speedy defense against rust - especially on cut edges or scratches. Galvanized coatings resist the effects of ammonia vapors and tend to perform better in the presence of livestock than Galvalume®.

The accuracy of the painted chips is not guaranteed. For 100% color matching, please request a free metal sample.
